

1 **51052/JEC/B600 -**

WHAT IS CLAIMED IS:

5

1. A computer-readable medium containing a data structure for storing voice
signals comprising a conversation list containing an entry for each of one or more
phone conversations, each entry comprising a single string of data records
wherein each data record has a file pointer to the next record, the last record
having an end of file marker, each record corresponding to at least one time
stamp of the phone conversation for use in restoring the data structure to a
media understandable by a user.

15

2 The computer-readable medium of claim 1, wherein the data structure
further comprises non-voice signals.

20

3 The computer-readable medium of claim 2, wherein the non-voice signals
are computer readable files.

25

4. The computer-readable medium of claim 1, wherein the data structure is
stored on a removable persistent memory element.
